

Joose Seppälä

Software Developer, Cooperative entrepreneur

Hello there!

I'm a young man who is specializing in the ICT sector and is eager to find a nice workplace as a trainee. Half a year ago I started my studies at JAMK University of Applied Sciences as transfer student from Bachelor of Energy Engineering degree programme. I'm going to graduate as a software engineer (B.Eng) in a few years and start working among software development after that. I'm interested in software development, project management, DevOps and especially working in a great team.

Now I'm looking for a summer job as a programmer trainee or working with projects. I'm a great choice to your company because of my widespread work experience, which has given me wide perspective into working life and knowledge from different business areas. I also have constant will to learn and develop my skills. My experience as cooperative entrepreneur has given me understanding about business strategies and skills to lead a small-scale company or projects.

I look forward to hearing from you. I'm very happy to be interviewed or I can introduce myself more via video.

Best regards,

Joose Seppälä

To my future workplace

Joose Seppälä

Software Developer, Cooperative entrepreneur

Accountabilities

I'm the chairman of cooperative company called Team Cameleon. I'm responsible for leading the company, company economics, hiring employees for small projects and marketing.

Hobbies

My favorite hobbies are freediving and spearfishing. I also have a small RIB boat for diving which I like to maintain and modify. When the lakes are frozen and the water is a little bit too fresh, I like to play some games or code on my computer.
