

Joose Seppälä

Software Developer, Cooperative entrepreneur

Hi there!

I'm a young man who is specializing to ICT sector and is eager to find nice workplace as trainee. Half a year ago I started my studies in JAMK UAS as transfer student from Bachelor of energy engineering. I'm going to graduate as software engineer in a few years and start working among software development after that. I'm interested in software development, project management, DevOps and especially working in a great team.

Now I'm looking for a summer job as programmer trainee or working with projects. I'm a great choice to your company because of my widespread work experience, which has given me lots of aspects and knowledge from different business areas. I also have constant will to learn and develop my skills. My experience as cooperative entrepreneur has given me understanding about business strategies and skills to lead a small-scale company or projects.

I'm very happy to be interviewed or I can introduce myself more via video.

Best regards,

Joose Seppälä

To my future workplace

Joose Seppälä

Software Developer, Cooperative entrepreneur

Matriculation Examination

Accountabilities

I'm chairman of cooperative company called Team Cameleon Osk. I'm responsible for leading the company, company economics, hiring employees for small projects and marketing.

Hobbies

My favorite hobbies are freediving and spearfishing. I also have a small RIB boat for diving which I like to maintenance and modify. When the lakes are frozen and the water is a little bit too fresh, I like to play some games or do some coding with computer.

Referees
